

Assignment-1

Assignment Title: Create a static web page which defines all text formatting tags of HTML in tabular format.

Name: Malhar Kadam

PRN: 123B1B155

DIV: C

Objectives:

- To understand different HTML text formatting tags
- To learn how text can be styled and emphasized using HTML
- To represent information in a clear tabular format
- To design a basic static web page using HTML only

Outcomes:

- Identify various HTML text formatting tags
- Explain the purpose of each formatting tag
- Use formatting tags to enhance text appearance
- Create a simple static HTML webpage
- Present technical information in a structured table

Theory Concept in brief

HTML (Hyper Text Markup Language) provides several **text formatting tags** that help in improving the **readability and presentation** of content on a webpage.

These tags allow developers to make text **bold, italic, underlined, highlighted, small, deleted, inserted**, and more.

Text formatting tags are mainly used to:

- Emphasize important text
- Improve visual clarity
- Convey meaning to users
- Structure content professionally

Conclusion

In this assignment, we studied different HTML text formatting tags and their uses. By creating a static web page, we learned how these tags help in changing the appearance of text such as making it bold, italic, underlined, highlighted, small, deleted, or superscript/subscript. Displaying the tags in tabular format made the information clear and easy to understand. This assignment helped us improve our basic HTML knowledge and understand how text formatting enhances the readability and presentation of web pages.
